### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***DETAILED ACTION***

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/28/04 has been entered.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 9 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujimoto (JP 11-095519) in view of Yamamoto et al. (US 5,612,771).

Art Unit: 2852

5. Fujimoto (...519) discloses a color image forming apparatus comprising: a transfer belt (213) which feeds a transfer member (P); a plurality of image forming units (Pa, Pb, Pc and Pd), which are disposed facing towards the transfer belt (figure 1), wherein each of the image forming units form a desired image and sequentially transfers the formed image on the transfer member fed by the transfer belt device ([0026]-[0028]); and where the transfer belt device, at least in a portion in which the image forming units have been disposed, is arranged such that it is inclined with respect to the ground (figure 1). Fujimoto (...519) does not disclose the claimed waste toner container. Yamamoto et al. (...771) disclose an image forming apparatus including a transfer belt and a waste toner container (44b) having a substantially triangular cross section (figure 12) is installed under the transfer belt such that an end portion of the waste toner container projects outwardly from an end portion of the transfer belt (figure 12). The waste toner container (44b) is installed under the transfer belt such that a side of the waste toner container closest to the transfer belt is substantially parallel to an inclination direction of the transfer belt (figure 12). It would have been obvious to one of ordinary skill in the art at the time of the invention to have the claimed waste toner container, as disclosed by Yamamoto et al. (...771), since such a placement and configuration is well known in the art.

***Allowable Subject Matter***

6. Claims 1-3, 5-8 and 10-19 are allowed.

Art Unit: 2852

### Response to Arguments

7. Applicant's arguments with respect to claims 9 and 23-25 have been considered but are moot in view of the new ground(s) of rejection.

### Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sandra L. Brase whose telephone number is 571-272-2131. The examiner can normally be reached on Monday-Thursday and alternate Fridays.
